

100% MADE IN INDIA

MDR

# Rotorless Rheometer

## Basic Rubber Physical Property

- New mechanical design to keep stable torque transmission.
- Great repeatability and reproducibility because of noise-resistance circuit and DFT algorithm.
- Build in controller calculate and analyze the signal independently without computer.
- Indicate test results as pass or fail using LEDs of different colors.
- Available foam pressure measure type.
- Database for remote access.

Universal Tensile Machine

Oscillating Disc Rheometer

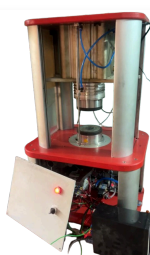

Mooney Viscometer

Tensile Testing Machine

Slab Curing press

Rheometer Upgradation
